SunStat Pro

SunStat Relay

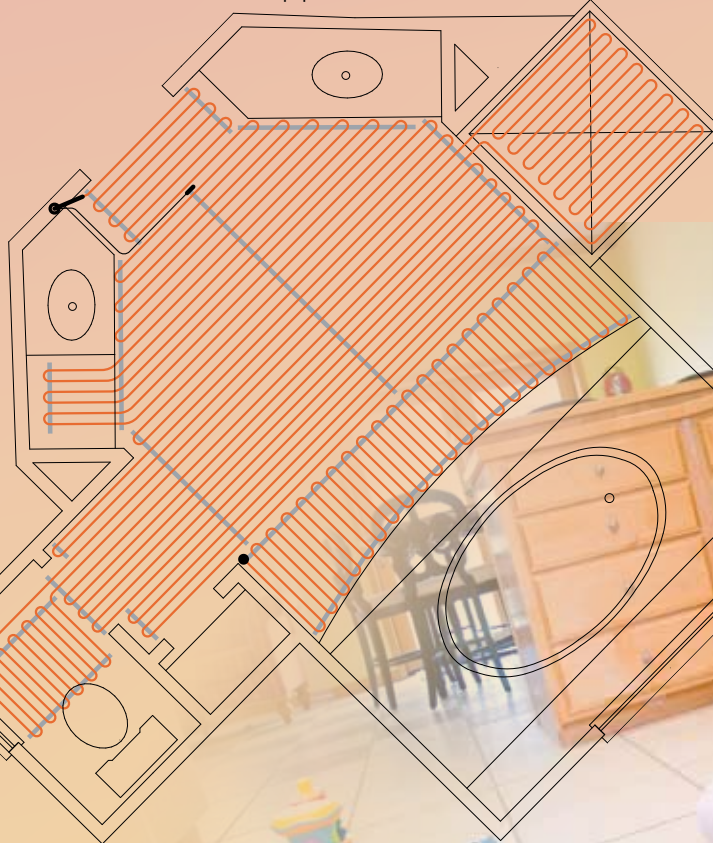

SunTouch® Mat

Almost every type of floor covering can be warmed with SunTouch. Warm, luxurious floors are popular in bathrooms, kitchens, entries, or any room with cold floors. Simply roll out SunTouch mats over your subfloor, shape them to fit the room, and cover with mortar and a finished floor.

SunTouch® WarmWire®

WarmWire cable heats like SunTouch mats, but it costs less and installs differently. Secure cable straps to the subfloor and stretch the cable between them before covering with masonry. WarmWire works great in large rooms and in complex room layouts. WarmWire is now approved for showers.

SunTouch® UnderFloor™

Remodeling is the perfect time to install a warm floor. If your finished floor is cold, install SunTouch UnderFloor mats between the floor joists to warm the room above.

UnderFloor works under any floor covering, including naildown hardwood.

SunTouch® Controls

SunTouch controls are offered in non-programmable and programmable models. An integral relay system is offered to control large systems. These dual-voltage controls sense floor or air temperature, have built-in GFCI protection and energy-saving "smart start" technology.

LoudMouth Monitor

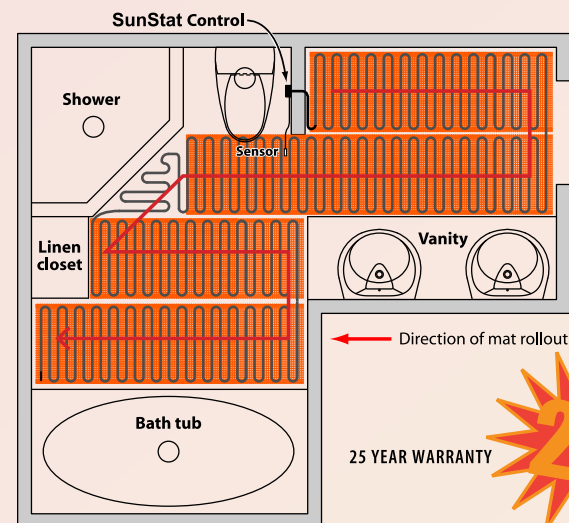

The LoudMouth monitors heating or snow melting cables during the entire installation process. An alarm sounds if the cables are cut or damaged, allowing for easy repair before they are covered.

Designed for safety.

All SunTouch cables are built with dual wires to shield against EMF (Electromagnetic Fields).

Our products are fully grounded and operate with ground fault circuit protection for safety. Made in America for families like yours and ours.

We're here to help.

SunTouch floor heating and ProMelt ice and snow melting products are produced in Springfield, Missouri. We're part of Watts Water Technologies, an American-based manufacturing company founded in 1874. We're here to help with all of your floor heating and snow melting projects.

SunTouch® ProMelt™ Mat

ProMelt mats hold the heating elements in place and they install quickly. All you need is a control and mat. Mats come in many sizes to fit your area and climate.

Fast and easy snow removal.

ProMelt is designed to melt snow and ice from concrete, asphalt, brick paver and stone surfaces.

Prevent accidents

- Reduce slips & falls on steps & walkways.
- Reduce "tracked-in" ice, snow & water.
- Reduce auto accidents.

Prevent damage

- Avoid salt damage to cars, floors & plants.
- Protect textured surfaces from snowplows.
- Protect landscaping from snowplows.

Save time and money

- Spend less time shoveling & salting.
- Improve customer access.

A tough product for a tough job.

ProMelt heating cables are built to last. They're made with low-oxygen copper elements covered with high-temperature ETFE insulation, a braided copper ground shield, and a super-tough polyurethane outer jacket for jobsite extremes.

SunTouch® ProMelt™ Cable

ProMelt cable uses the same heating elements as the mats, but it costs a bit less. Cables come on a roll, making it easy to choose spacing depending on the application. Typical spacing is 3" or 4" on center.

- **FREE design assistance**
- **Works under concrete, asphalt, pavers, and tile.**
- **Easy to install**
- **Automatic operation**
- **No maintenance**
- **Spooled cables or 2' and 3' wide mats**
- **Single-point connection**
- **120V, 208V, 240V, and 277V models**
- **Sizes from 8 to 115 sq. ft. (can be combined to melt larger areas)**
- **10 year warranty**
